

**** If 10% of the population attending either of these venues, then suggest a quarantine of the area until deemed controlled ****

Team B Plan – Both events will move forward.

Military officials prepare to launch the new ship; International visitors begin to arrive for the International Computer Games Conference

Launch Ceremony – Hampton Roads Area

Coordination: Federal, State, and Local

- Contact HHS and have NDMS on standby
 - Bring in the HHS regional emergency coordinator
- Establish command, control, and communications center (Note: The HHS Secretary's Command Center (SCC) will provide national liaison between the Federal Government headquarters (HQ) and appropriate regional officials in the response structure at the disaster scene for the coordination of Federal health and medical assistance to meet the requirements of the situation.
 - ESF #8 will develop and implement procedures for providing these recurring Situation Reports (SITREPs)
 - CDC, DHS, Public health officials, press officials, FEMA, White House
 - When appropriate, operationalize the communications plan

Communications recommendations:

- Advise that only the most VIP and necessary personnel are on the 'stage' and if needed encourage the public not to attend

Hospitals and Alternate Sites of Care

- Alert local hospitals of potential surge from visitors to the Base as a backup to the Base medical and any VA facilities in the local area
 - Have the Navy Base medical clinic on standby X days prior to the event, during the event, and X days following the event
 - Engage hospitals and public health in the local area and find out what their ability is to surge (might get information from HHS HavBed systems)
 - Find out what available volunteers are in the local area, find out which ones have been vaccinated for H1N1 or already had H1N1 and request they remain on standby to support the events
 - Have a staging area for individuals who fall ill at the launch site with available transportation to either the Naval medical facility or local hospital
 - Separate those whose symptoms are unrelated to the new virus provide separate transportation as needed

- Have Protocol setup the launch site to allow adequate distance from the crowd of on-lookers – possibly setup several marked smaller viewing areas

Medical Supplies

- Bring in additional medical supplies (if available): reach out to specific non-Federal sources such as major pharmaceutical suppliers, hospital supply vendors
 - PPE, Prophylaxis, other medical countermeasure and medically necessary products

Red Cross

- Notify the Red Cross – patient information will be provided to the RC as defined in ESF 8

Law enforcement

- Have military police on alert
- Coordinate with local law enforcement to help keep unnecessary people away
- Include FBI and volunteers where needed

Cross Sector Issues:

- Work with Dept of Transportation to address issues related to international flights
- Coordinate with Emergency Services, Water, Food and Ag, Energy

** If 10% of the population attending either of these venues, then suggest a quarantine of the area until deemed controlled **

Plan B – International Gaming Conference

Coordination: Federal, State, and Local

- Contact HHS and have NDMS on standby
 - Bring in the HHS regional emergency coordinator
- Find out what available volunteers are in the local area, find out which ones have been vaccinated for H1N1 or already had H1N1 and request they remain on standby to support the events
- Establish command, control, and communications center (Note: The HHS Secretary's Command Center (SCC) will provide national liaison between the Federal Government headquarters (HQ) and appropriate regional officials in the response structure at the disaster scene for the coordination of Federal health and medical assistance to meet the requirements of the situation.
 - ESF #8 will develop and implement procedures for providing these recurring Situation Reports (SITREPs)
 - CDC, DHS, Public health officials, press officials, FEMA, White House
 - When appropriate, operationalize the communications plan

Communications and Outreach Recommendations:

- Post health information on conference web-site (CDC links, local hospital numbers, do's and don'ts for the flu, etc.)
- Encourage on-line registration, non-public computer use (for checking email, printing a document, things of that nature usually available at conferences)

Have all appropriate information regarding the flu posted in several places during the conference and available as handouts

Hospitals and Alternate Sites of Care

- Alert local hospitals of potential surge from visitors to the Base as a backup to the Base medical and any VA facilities in the local area
 - Have the Navy Base medical clinic on standby X days prior to the event, during the event, and X days following the event
 - Engage hospitals and public health in the local area and find out what their ability is to surge (might get information from HHS HavBed systems)
 - Find out what available volunteers are in the local area, find out which ones have been vaccinated for H1N1 or already had H1N1 and request they remain on standby to support the events
 - Have a staging area for individuals who fall ill at the launch site with available transportation to either the Naval medical facility or local hospital

- Separate those whose symptoms are unrelated to the new virus provide separate transportation as needed
- Have a staging area away from the main rooms of the conference for individuals who fall ill at the convention site with available transportation to local hospitals as needed

Medical Supplies

- Bring in additional medical supplies (if available): reach out to specific non-Federal sources such as major pharmaceutical suppliers, hospital supply vendors
 - PPE, Prophylaxis, other medical countermeasure and medically necessary products, disposable thermometers, disinfectant, hand sanitizer, etc.

Red Cross

- Notify the Red Cross – patient information will be provided to the RC as defined in ESF 8

Law enforcement

- Coordinate with local law enforcement
- Include FBI and volunteers where needed

Cross Sector Issues:

- Work with Dept of Transportation to address issues related to international flights
- Coordinate with Emergency Services, Water, Food and Ag, Energy
